Have you considered
Column Concept?

Column 2 Vertical

The most modern execution of a traditional concept, this classic style brings innovation and reliability to a high performance design.

Vertical and horizontal options offer a modern alternative to a traditional panel radiator, and will enhance both contemporary and traditional settings.

Prices exclude VAT

Btu/hr @ △t50°C

- LST Standard gives you the option to specify controls.
- LST Standard has the option to reverse the attractive outer casing to suit the pipe layout.
- For peace of mind the paint finish is anti-bacterial.
- The LST Standard comes complete with all components required in one easy package.
- The internal emitter generates excellent heat outputs through convection.
- Tested to high standards, the emitter has a maximum working pressure of 145psi (10.0 bar) and conforms to BS EN 442.

Working pressure:
Tested to withstand 10.0 bar

10 Year Warranty ON EMITTER

5 Year Warranty ON CASING

Available for Alto Line Concept, Column Concept, Column Vertical Concept, Everest Line Concept, Plan Concept, Plan Vertical Concept, Silhouette Concept, Verona Slimline Concept & Verona Vertical Concept.

The colours shown throughout the brochure are reproduced as accurately as this process will allow and can be made to order on the identified products.

Please Note: Colour options are available in the Arno Towel Rail Range and Verona Towel Rail only. Price of coloured radiators are available on request. When a coloured radiator has been ordered it cannot be cancelled or returned. All coloured radiators have up to an 8 week lead time from date of order.

Glossary

Btu/hr British Thermal Unit per hour is the standard measurement used to state the amount of output of any heat generating device.

Watts Is another measurement for heat output, 1 watt is equivalent to 3.412 Btu/hr.

Type 11 Also known as Type K1, is a type of radiator with 1 radiator panel and 1 set of convection fins.

Type 21 Also known as Type P+, is a type of radiator with 2 radiator panels and 1 set of convection fins.

Type 22 Also known as Type K2, is a type of radiator with 2 radiator panels and 2 sets of convection fins.

Type 33 Also known as Type K3, is a type of radiator with 3 radiator panels and 3 sets of convection fins.

△t Refers to the difference in temperature between the water circulating in the central heating system and that of the ambient temperature. It is important to use the correct △t when selecting your radiators, as the same radiator will have different outputs at different water temperatures.

△t50 △t50 is the UK standard, however Henrad also quote at lower levels for lower water temperature systems.

Heat loss Is the amount of heat a room loses, it is therefore an important calculation when determining what size radiator is required to heat a room to the correct level.

Warranty The warranty covers any defect that is attributable to a manufacturing, assembly or material fault, further details available on request.

Is a set of International regulations related to quality management systems.

TBOE / BOE Refers to which position the pipes are connected to the radiator, OE means opposite end i.e. 1 pipe on each side, TB is top bottom i.e. 1 pipe is connected to the top and 1 to the bottom, B is both pipes connected to the bottom.

EN 442 is the European standard which defines the manufacturing standards for radiators and convectors which operate at temperatures of less than 120°C. The standard defines the type of steel which must be used, the type of pressure testing which must be carried out and the accuracy of the heat outputs quoted in the literature.

RAL A European wide colour matching system.

BSP British Standard Piping.

The CE marking is the manufacturers declaration that the product meets the requirements of the applicable EC directive. This is applicable to all Henrad products.

The Manufacturers' Association of Radiators and Convectors.

Standard steel panel products, which are installed in toilets or any areas of high humidity (including bathrooms, kitchens and shower rooms, etc.) are limited to a twelve months parts and labour warranty.
